

# KIDS BIBLE VIDS

## How to Use

The goal of Kids Bible Vids is to teach kids how to apply scripture to their lives. Rather than give a lesson, we invite the kids to find the lesson and 'Good News' in every Bible story. We want to teach kids *how* to be disciples. So in each episode we show kids doing this process, then we throw to the audience and ask them to repeat the process and reflect on the story.

### 1. Set up the Segment

Gather the kids in close around a projector screen, TV, iPad or iPhone.

**Say to the kids:**

"We're going to watch a Bible story, but pay close attention because afterwards we're going to ask some questions. And I've got prizes for the best answers".

Bribery is great, have lollies ready to hand out!

### 2. Watch the Video

If you have the time, test the video beforehand to make sure the sound is right and it streams ok.

### 3. Ask the Questions

**What did you like about the story?**

Praise every answer, even if it's silly. You want to get the conversation rolling.

**What does the story tell you about Jesus?**

Again, praise and reward them if they give an answer. Even if they're repeating other peoples answers.

**How can this story help you in life?**

This question is a little bit harder. Some kids may not have an answer. That's ok. Maybe you can offer your own.

### 4. Pray

If it's appropriate, say a short prayer with the kids. But also, pray for the program beforehand and afterwards. And if you can, have other people praying for your time together. Pray that the Holy Spirit would give the kids insights into the stories and that they would come to know and love God.
